Interactive whiteboard Avtek TT-BOARD 80

Code: 1TV068

Avtek TT-BOARD 80 interactive whiteboard offers the best value when it comes to IWBs: IR touch technology, 10 touch points and a dry erase surface enclosed in a solid, aluminium frame. TT-BOARD 80 is also fitted with two sets of hotbars on each side, containing the most used functions and one user-definable key.

In the TT-BOARD 80 package is also brand new Avtek software, Avtek Interactive Suite, offering lots of advanced functions.

Whiteboard can be used as a regular touch Screen thanks to IR touch technology, which allows use with any kind of pointer.
10 touch points allow multiple students to work at the same time without worrying about touch detection.

A durable surface gives important benefits:

- Dry eraseability makes it possible to use this interactive whiteboard as a regular dry-erase whiteboard
- Allows using magnets on the surface
- Displays a high-quality image from a projector
- great for classrooms because of its dry erase function and very high damage resistance

Toolbars on each side of the whiteboard allow for quick and efficient access to the most commonly used functions, which makes use of the board more intuitive
Plug&Play standard means that it does not need drivers to work with Windows Vista, 7, 8.1 and 10 (32 and 64 64-bit) systems
Software is available in English

The most up-to-date version of software and drivers is available here:
