

Interactive whiteboard Avtek TT-BOARD 90 Pro

Code: 1TV110

The **Avtek TT-Board 90 Pro** interactive whiteboard offers the best functionalities available in IWBs, featuring IR touch technology, 10 touch points, and a PolyVision e3 ceramic surface with a lifetime warranty, all enclosed in a solid aluminium frame. Those features allow TT-BOARD 90 Pro to be used both as a regular dry-erase whiteboard and as a great interactive tool. TT-BOARD 90 Pro is fitted with two sets of hotbars on each side, containing the most used functions and one user-definable key, an interactive pentray with 3 colours and an eraser.

In the TT-BOARD 90 Pro package, there is also brand new Avtek software, Avtek Interactive Suite, which offers lots of advanced functions.

Whiteboard can be used as a regular touchscreen thanks to IR touch technology, which allows use with any kind of pointer.

10 touch points allow multiple students to work at the same time without worrying about touch detection

PolyVision ceramic surface gives important benefits:

- Very high durability and dry eraseability make it easy to use this interactive whiteboard as a regular dry erase whiteboard without damaging the surface
- Allows using magnets on the surface
- Displays a high-quality image from a projector
- Great for classrooms because of its advanced dry erase function and very high damage resistance

Toolbars on each side of the whiteboard allow for quick and efficient access to the most commonly used functions, which makes use of the board more intuitive

Plug&Play standard means that it does not need drivers to work with Windows XP, Vista, 7, 8.1 and 10 (32 and 64-bit) systems
The interactive pen operates 3 colours of stylus (black, red, blue), an eraser function and also includes a telescopic pointer
Software in English language version

The most up-to-date version of the software and drivers is available here
